

The Space Pillow

Say hello to this out-of-this-world pillow that uses the same memory foam technology as developed by NASA to create the most supportive pillow on the market! This pillow is infused with gel beads to keep you cool and ultra supported all night long.

Dimensions

600mm (W) x 400mm (D) x 140mm (H)

More Information

Developed from NASA space foam technology!

Yes, you read that right! We've employed the same technology as developed by NASA to create the most supportive pillow on the market. Our memory foam absorbs shock, contours to head, shoulders and neck, and cradles you into a deep, ultra supportive sleep.

Infused with cooling gel

Survive the hot Aussie summers in style with this pillow's gel infusion. The gel in this pillow absorbs heat, cools it down, and helps regulate your body temperature to a comfortable and healthy sleep temperature all night long.

Super soft bamboo fabric

Bamboo isn't just for pandas anymore! We've covered this design in luxurious bamboo fabric that is not only buttery soft but also helps to thermoregulate through the night - meaning it stays cool in summer and cozy in winter!

Machine washable removable cover

Laundry day just got even easier! Simply slip the cover off, pop it in the washer, and you're good to go.

Low allergy, low irritant, high quality

Put away the antihistamines, this nifty little design's high-quality anti-microbial, anti-allergen makeup won't trigger your allergies like others alike!

Meets all CertiPUR-US standards

We've had this product tested by CertiPUR-US to ensure that there's absolutely no nasties in our products.
